

**SAFETY RECALL L16
LEFT TIE ROD**

Dear: (Name)

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Chrysler has decided that a defect, which relates to motor vehicle safety, exists in some **2008 through 2011 model year Ram Trucks. Also involved are 2003 through 2008 Ram Trucks that had the steering linkage replaced with Mopar service parts.**

The problem is... The left tie rod ball stud on your truck (VIN: xxxxxxxxxxxxxxxxxxxx) may fracture under certain driving conditions. This could cause a loss of directional control and/or a crash without warning. Also, the front axle track bar bolt torque must be checked and tightened if required.

What your dealer will do... Chrysler will repair your vehicle free of charge (parts and labor). To do this, your dealer will tighten the front axle track bar bolt, inspect the left tie rod end and replace it if required. The work will take about ½ hour to inspect and an additional hour if the tie rod requires replacement. However, additional time may be necessary depending on service schedules.

What you must do to ensure your safety... Simply contact your Chrysler, Jeep, or Dodge dealer right away to schedule a service appointment. Ask the dealer to hold the parts for your vehicle or to order them before your appointment. **Please bring this letter with you to your dealer.**

If you need help... If you have questions or concerns which your dealer is unable to resolve, please contact the Chrysler Group Recall Assistance Center at 1-800-853-1403.

Please help us update our records by filling out the attached prepaid postcard, if any of the conditions listed on the card apply to you or your vehicle. You may also update this information on the web at www.dodge.com/ownersreg.
