NEW 2015

DODGE CHALLENGER
Redesigning an icon isn’t light work. A staunch allegiant is poised at the ready to evaluate every tweak. One false move will ignite a revolt. With designers and engineers who pride themselves as being enthusiasts first, it was capable hands that transformed this modern classic into its newest evolution. This is the new 2015 Dodge Challenger — styled to turn diehards on and outfitted with enough technology to satisfy a new generation of thrill-seekers. One drive assures everyone that its performance is strong enough to uphold the weight of its legendary reputation. As the world’s fastest muscle car ever\(^{(2)}\) Challenger SRT\(^{(2)}\) Hellcat brings powerful bragging rights to the table. The new Supercharged 6.2-liter HEMI\(^{®}\) V8 unleashes an
outrageous 707 horsepower and staggering quarter-mile time in the 10-second range† // 1971-inspired heritage styling cues // Class-exclusive† TorqueFlite® eight-speed automatic // All-new interior // Up to 30 mpg highway‡ with the 3.6-liter engine and 707 horsepower with the Supercharged 6.2-liter SRT® HEMI® V8 // New 485-horsepower Scat Pack model // Most technologically advanced powertrain† // Heritage colors // Class-exclusive† five-link independent rear suspension // Most technologically advanced vehicle in its class† // Class-exclusive† seven-inch reconfigurable digital gauge cluster and 8.4-inch touchscreen // Best-in-class† cargo volume // Only vehicle in its class† with five-passenger seating.

* A note about this brochure: all disclaimers and disclosures can be found on the back cover. NHRA certified 10.8 @ 126 with street legal drag tires. 11.2 @ 125 with production tires. EPA estimated 19 mpg city/30 mpg hwy. Actual results may vary.
This is more than the fourth-generation Challenger. This is the bringing-forward of a new wave of enthusiasts. A generation of drivers who cut their teeth on stories of drag strips, horsepower and custom details. But to move forward, it’s important to know where you came from.  

1970–1974 The birth of a legend, generation one. Some might say this was the golden age of muscle. The Dodge Challenger was officially introduced in the fall of ’69 as the heavyweight contender in a fiercely competitive segment. Challenger came to the table offering customers more content, more performance and more value than its counterparts. With models like the standard two-door coupe, convertible or coveted R/T, there was one to fit all customers. Offered with a wide range of available exterior colors, features and interior options, customers had the ability to make their Challenger truly their own. The only thing more impressive than the custom details was the potent lineup of engines like the 340 Six-Pack V8 with up to 290 horsepower, a 383 Magnum V8 with up to 335 horsepower, 440 Six-Pack with up to 390 horsepower or the fire-breathing 426 HEMI® V8 with up to 425 horsepower.  

1978–1983 The second wave. The re-launched Challenger came to market in a much different way than its predecessor. Raw power without regard to consumption was confronted with the reality of rising gas prices and increasing emissions standards. In order to compete in the ever-growing segment, Dodge produced a new Challenger this time sporting 4-cylinder fuel efficiency.  

2008–2014 After a decades-long hiatus, Dodge Challenger returned and breathed fresh life into the muscle car scene. Revamped with modern technology, efficient performance and the legendary DNA of its forefather, Challenger instantly became an enthusiast favorite. It was flawlessly sculpted with a lean, low profile, an unmistakable performance hood and throwback honeycomb grille. With a design inspired by the 1970 Challenger, the return of the HEMI V8 with up to 425 horsepower and rear-wheel drive, it earned serious street respect.  

2015 The rebirth of a legend. The newest generation Challenger powers forward while taking design cues from arguably one of the most coveted Challenger models — the 1971. It stays true to its pony-car roots by offering drivers a bigger fistful of performance through an impressive powertrain lineup. It offers more technology than ever before and an interior that will satisfy both purists and those looking for the latest must-have features. With the launch of the SRT® Hellcat, Challenger becomes the most powerful muscle car ever with an insane 707 horsepower and the fastest muscle car ever with a NHRA certified 10.8-second quarter-mile time.  

*NHRA certified 10.8 @ 128 with street legal drag tires. 11.2 @ 125 with production tires.
2015
Retro styling cues courtesy of one of the model’s most coveted editions include heritage split grille surround, LED halo lighting, larger power-bulge hood and new split LED taillamps.
How do you make a classic even more legendary? You give it an amped-up attitude so fierce that it’s impossible to ignore.
///// Challenger R/T Scat Pack shown in Bright White.

///// Challenger SXT Plus shown in B5 Blue Pearl.

///// Challenger 392 HEMI® Scat Pack Shaker shown in Billet Silver Metallic.
This is what happens when you have 45 years of muscle car heritage coursing through your veins. You get a modern-day marvel that’s engineered with more passion, precision and performance than ever before.

**TRACK-PROVEN TUNED CHASSIS **** High-demanding track conditions call for tightly engineered hardware. Challenger R/T Scat Pack and 392 HEMI® Scat Pack Shaker showcase an all-new high-performance tuned chassis that’s ready to go.

**SHOCK ABSORBERS **** Bilstein® high-performance shock absorbers are precision-damped to provide a confident, smooth ride for the everyday commute while being fully capable for weekend track duty.

**SUSPENSION **** Challenger offers a variety of options ranging from Sport-tuned to high-performance to the top-of-the-line competitive suspension featuring adaptive damping to suit every driver’s preference. A bold combination of movement and staying power comes from a sophisticated suspension geometry and rear-wheel drive. Whether it’s the everyday commute or more challenging driving situations, the class-exclusive independent five-link rear suspension is finely tuned to help provide superior handling and a comfortable ride. When the rubber meets the road, a lower unsprung mass helps maintain better tire contact with the ground and reduces road noise. Models equipped with a 6.4-liter HEMI V8 feature unique suspension geometry that helps improve balance, cornering ability and steering responsiveness. Exclusive Bilstein shocks and a lowered suspension allows these performers to achieve 0.93g on the skid pad — on par with some of the world’s best-handling cars. The three-mode Bilstein Adaptive Damping System on Challenger SRT® models takes drivers from Street Mode (sporty) to Sport Mode (firm) to Track Mode (firmest, max handling).

**AGGRESSIVE FRONT- AND REAR-CAMBER GEOMETRY **** Performance handling requires maximum road-holding grip, and Challenger Scat Pack models deliver with aggressive front- and rear-camber geometry. Set at –1.0 degrees in the front and –1.75 degrees in the rear, Challenger is set up for high-speed cornering with its tires leaning inboard at the top relative to the body.

**BRAKES **** Standard four-wheel antilock disc brakes and available Brembo® brakes. Improved Brembo brake cooling and fade performance comes courtesy of wind tunnel-designed brake cooling ducts that direct airflow to vented rotors for consistent stopping power.
The class-exclusive TorqueFlite® eight-speed automatic transmission delivers up to an 11-percent fuel efficiency improvement and world-class precision. Available Dodge Performance Pages, paddle shifters and standard Sport Mode help lower shift times from 350 ms to 160 ms, depending on model.

When the TorqueFlite is mated to the Supercharged 6.2-liter SRT® Hellcat HEMI® V8 it’s fortified to withstand the groundbreaking 707 horsepower and 650 lb-ft of torque unleashed by the engine. Enhancements include additional pinion gears and five more clutch pack discs.

The passion of the manual is alive and well. Challenger also offers the intensity of a heavy-duty TREMEC® six-speed manual transmission that boasts an external vehicle-mounted oil cooler. Standard on R/T and SRT models.
POWER

WITHOUT COMPROMISE

/// 3.6L DOHC PENTASTAR® VARIABLE VALVE TIMING (VVT) 24V V6 WITH 305 HP AND 30 MPG HWY.* This robust 3.6-liter V6 satisfies your rational side with up to 30 mpg highway* and keeps your emotional side charged with 305 horsepower and 0 – 60 in an estimated six seconds. It's the combination of a new TorqueFlite® eight-speed transmission, fully independent dual-cam phasing, sequential port fuel injection, and high-flow intake and exhaust ports that result in this exceptional blend of high torque and fuel efficiency.

/// SUPER TRACK PAK: Challenger was born to perform. Opt for the Super Track Pak for an edgier drive and even tighter handling. Package highlights include performance-tuned steering, Sport suspension, four-wheel heavy-duty disc brakes, 3.07 or 3.90 rear axle ratio (based on engine and transmission), 20-inch Hyper Black aluminum wheels, P245/45ZR20 Goodyear® Eagle F1 Performance Supercar tires, and three-mode Electronic Stability Control (ESC)* that can be completely deactivated for the ultimate track experience. Available on every SXT and R/T.

Dodge Challenger and HEMI, two legendary names that still fuel the fantasies of muscle car enthusiasts. Pair the 5.7-liter HEMI V8 with a standard TREMEC® six-speed manual (375 hp, 410 lb-ft of torque) and it takes you from 0 – 60 mph in the low five-second range while intoxicating exhaust notes purr at idle and roar under acceleration. When equipped with the TorqueFlite® eight-speed automatic (372 hp, 400 lb-ft of torque) and Fuel Saver Technology, eight cylinders transition to four when full power is not required to help provide an increase in fuel efficiency while also delivering a 13.2-second quarter-mile time.

For those with an appetite for raw power, the available HEMI V8 delivers a performance feast — 485 horsepower, 475 lb-ft of torque, an impressively flat torque curve and a 0 – 60 time in the low four-second range. When equipped with the TorqueFlite eight-speed, Fuel Saver Technology deactivates four cylinders when eight are not needed, creating a double threat of power and efficiency. The incredibly aggressive exhaust note floating from the pipes is just sweet icing on top.
/// MARKS THE RETURN OF THE SCAT PACK
POWER WITH THE CHOPS TO BACK IT UP

Challenger didn’t become an icon overnight. It’s dominated the road since the golden age of muscle. When the only thing better than owning a muscle car was owning one unlike any other. A time when you didn’t show up unless your car was tricked out with parts, stripes and a Scat Pack sticker on the quarter-glass that served as a tell that your Challenger was hiding something substantial under the hood. It’s time for a rebirth. It’s time to awaken the legends: 2015 Challenger R/T Scat Pack and Challenger 392 HEMI® Scat Pack Shaker.

THEY’VE EARNED THEIR STRIPES

These vehicles are for those seeking the ultimate combination of raw power, pure performance and authentic attitude. 392 HEMI Scat Pack Shaker is the real deal, straight from the factory. We’re talking functional, fully floating, open-element Shaker hood scoop with cold air induction. A Mopar® Cold Air Intake, conical air filter and legendary 6.4-liter HEMI V8 engine churn out 485 horsepower and 475 lb-ft of torque. Because power means nothing without control, four-piston Brembo® brakes, 3-mode Electronic Stability Control (ESC)® with Full-Off Mode, and high-performance suspension with 20x9-inch wheels and performance steering are standard.

The 392 HEMI Scat Pack Shaker shows its supremacy with a 392 HEMI badge on the Shaker hood scoop, bold hood-to-tail stripes and a retro fender badge.
It starts with the boldest of statements — the most powerful and fastest muscle car ever. And it duly delivers 707 horsepower, 650 lb-ft of torque, a bewildering quarter-mile time of 10.8 seconds and a top speed of 199 mph. There is no other production car that can match the hard-core power of the 2015 Dodge Challenger SRT Hellcat propelled by the all-new Supercharged 6.2-liter SRT Hellcat HEMI® V8. Drivers can opt to mate this powerplant to the all-new TorqueFlite® eight-speed automatic transmission that’s uniquely designed to withstand the groundbreaking horsepower and torque or, to the high-performance Viper modified TREMEC® six-speed manual transmission that boasts an internal cooling pump and external, vehicle-mounted oil cooler.  

*NHRA certified 10.8 @ 126 with street legal drag tires. 11.2 @ 125 with production tires.
HORSEPOWER

THE MOST POWERFUL MUSCLE CAR. EVER.

707

///// Challenger SRT® Hellcat shown in TorRed with standard 20- x 9.5-inch lightweight forged aluminum wheels with available Brass Monkey finish.
This isn't a show dog with no bite to back up its bark. It's the Supercharged 6.2-liter SRT Hellcat HEMI® V8 and this fierce feline lives up to the hype. With more than 90 percent of its content upgraded, it's completely capable of handling the raw power churning under its hood. The breakthrough engine features all-new internals with a forged-steel crankshaft and induction-hardened bearing surfaces, a specially tuned crank damper tested to 13,000 rpms, high-strength forged-alloy pistons coupled to powder-forged connecting rods, high-load capacity bushings and diamond-like carbon-coated piston pins. Premium-grade heat-treated aluminum cylinder heads with die-cast aluminum rocker covers are optimized for superior thermal conductivity.

The all-new Supercharger features the technology of a 2,300 cc/rev blower, with internal charge coolers and an integrated electronic bypass valve that regulates boost pressure to a maximum of 80 kPa (11.6 psi) with the capability to flow approximately 30,000 liters of air per minute. That's enough to suck the air out of a 10- x 13-ft room in one minute. The twin screw rotors are specially treated to accommodate tighter internal tolerances between the rotors and improve overall performance. Air is delivered into the engine's air box via the Air Catcher Inlet Port located in the driver's-side parking lamp and lower fascia. A 92-mm throttle controls air flow into the Supercharger; air then flows through the Supercharger screws, the air charger coolers and then into the inlet port — another unique Challenger SRT Hellcat feature.

When you've got power like this, it's a given that the exterior demands some exclusive extras. A Viper inspired aluminum hood crowns SRT Hellcat, while the functional scoop is flanked by an equally functional set of air extractors. The dual extractors effectively remove heat from the engine compartment and reduce air turbulence. There are bold SRT Hellcat badges on the fenders, so there's no mistaking SRT Hellcat from anything else on the road. SRT Hellcat's uniqueness doesn't end there. Owners are handed both a Red and Black key fob at delivery. The Black key restricts power to 500 horsepower, while the Red key unlocks the full 707 horsepower.
Challenger SRT® 392 shown in Billet Silver Metallic with available Black twin center stripe.
Challenger SRT® 392 bulked up in the off-season. It makes its 2015 debut with an even more powerful, more robust, naturally aspirated 6.4-liter SRT HEMI® V8 engine now boasting 485 horsepower and 475 lb-ft of torque. Both SRT 392 and SRT Hellcat let drivers personalize their drive experience via the all-new Drive Modes feature. Drive Modes are pre-configured for Sport, Track and Default settings, but also feature a Custom setting for a uniquely tailored experience of the power, transmission, paddle shifters, traction control and suspension.

///// Custom — Allows the driver to personalize the vehicle’s performance
///// Sport — Delivers increased vehicle performance capability over the Default Mode
///// Track — Delivers maximum vehicle performance capability on smooth, dry surfaces
///// Default — Activates automatically when starting the vehicle, delivering a sporty and comfortable ride

Inside, both SRT 392 and SRT Hellcat sport a blend of premium materials, race-inspired technology and heritage-influenced design cues. The standard SRT performance steering wheel features full-circumference heat while the standard high-performance heated and ventilated seats keep you in place with aggressively bulked-up bolsters with high-grip Alcantara® suede inserts. Performance stats and vehicle data can be customized and viewed in more than 125 potential configurations between the seven-inch reconfigurable digital gauge cluster and Performance Pages viewable from the standard 8.4-inch touchscreen.
The fastest muscle car in history needs world-class stopping power. Usher in the largest front brake package ever to be offered on a Chrysler Group passenger vehicle. It starts with lacquered Red Brembo brake calipers at each corner with 15.4-inch six-piston front two-piece and 13.8-inch four-piston rear vented and slotted rotors. These robust plates are optimized for performance, and the two-piece modular design aids heat dissipation to facilitate effective and repeatable cooling.
ENGINE / TECHNOLOGY

EXPLODED VIEW OF THE SUPERCHARGED 6.2-LITER SRT® HELLCAT HEMI® V8 ENGINE.
Challenger is the only vehicle in its class to offer the available TorqueFlite® eight-speed automatic transmission.

4 gearset design: wide ratio spread to cover everything from acceleration to highway cruising; small gear ratio steps to avoid busy shifting despite having 8 gears.

5-clutch Pack Design with only 2 open clutches in any gear for reducing drag losses.
SEAMLESS: RINGS OF FIRE

They say lightning doesn’t strike twice. We disagree. Dodge designers harnessed the essence of one of the most revered Challenger models in history to create the new 2015. This modern-day icon is the spiritual successor to the ‘71. You can see the throwback cues in the menacing all-new projector headlamps with quad halo LED surrounds, the heritage split grille surround and the hood’s power-bulge and functional inlets. Walk around this rebirthed legend and you’ll find it looks as intimidating from the rear as it does from the front. But that doesn’t mean Challenger can’t throw other motorists a bone every now and again. As you cross over into the passing lane and back again, Challenger gives other drivers a breathtaking parting shot — bold new seamless split LED taillamps. Their design nods to the past while projecting a contemporary appearance.
BRAGGING RIGHTS: COME STANDARD

//// Some available equipment shown.
Some available equipment shown.
More than 40 years of passion and innovation meld modern technology and throwback design seamlessly. The result is an interior that equally matches Challenger’s hard-core exterior. The focus of this completely refreshed cockpit was the driver. Everything has been mapped and calculated for convenience, including the performance-inspired steering wheel with available paddle shifters and push-button start. Heritage-inspired Tic-Toc-Tach gauges recall the original Challenger interior as does the shifter, door panels with premium soft-touch materials, and driver-centric center console featuring standard genuine stamped aluminum trim.

As the only vehicle in its class\textsuperscript{11} with five-passenger seating and with more interior volume than any other muscle car\textsuperscript{11} there’s room for everyone.

\textit{Challenger R/T Plus shown with Black Nappa leather trim.}
ICONIC

///// Heritage-inspired Tic-Toc-Tach gauges.
Challenger R/T Scat Pack shown with Black Nappa leather trim with Alcantara® Ruby Red suede inserts and Scat Pack logo.
ALL SYSTEMS GO

Its aura may be throwback, but its mechanics are pure 21st-century. As the most technologically advanced car in its class, Challenger offers plenty of class-exclusive features, including the seven-inch reconfigurable digital gauge cluster. Buttons on the steering wheel let you scan through hundreds of different vehicle configurations and customize what information you see and how you see it.
Monitor lateral and longitudinal G-forces.*

Measure standing-start 0 – 60 and quarter-mile times as well as reaction times and previous attempts.*

Receive turn-by-turn display directions.*

Information is displayed in full color with rich graphics.

*Screens shown are optional depending on model and package.
A touchscreen Uconnect® system, as large as an available class-exclusive 8.4 inches, houses available Dodge Performance Pages, which feature everything from Launch Control to G-force meter to drag-race timers. This real-time data can also be displayed on the new standard seven-inch reconfigurable digital gauge cluster nestled between the dashboard gauges. For an even greater degree of personalization, Challenger’s standard Sport Mode with available customizable settings can also be accessed through the touchscreen and allows for adjusted steering feel, transmission shifting, throttle mapping, traction control and paddle shifters.

Challenger R/T Plus with Super Track Pak shown in TorRed.
Engineered with technology, Uconnect® brings a range of communication and entertainment services directly to your Challenger. Intuitive and customizable, available Uconnect systems include a touchscreen display up to 8.4 inches and steering wheel-mounted controls that operate features like a Bluetooth® enabled phone, Voice Command®, navigation, radio, cruise control and more.

Impressive in-vehicle connectivity through available Uconnect Access. Access the following offerings with the simplicity of Voice Command® and fingertip control:

9-1-1 CALL[6] In the event of an emergency, a Call button on your rearview mirror connects you to local authorities.

ROADSIDE ASSISTANCE CALL[7] Flat tire or out of gas? The rearview mirror Assist button connects you to Roadside Assistance Service, which pinpoints your location. Additional fees may apply.

STOLEN VEHICLE ASSISTANCE[8] If your vehicle is stolen, Uconnect can provide its location to aid police recovery.

THEFT ALARM NOTIFICATION[9] Choose to receive a text or email alert anytime your vehicle’s theft alarm is activated.
PHONE ///// Voice-activated communication lets you talk on your Bluetooth® phone nearly hands-free and up to 1,000 phone address book entries are synced every time you get into your Challenger.

WEB ///// Put the power of high-speed Internet in your Challenger with Mopar® Web. Passengers can use multiple devices at the same time, and there’s no need for cell cards or software. Available. Subscription required. Sold separately.

VOICE COMMAND ///// Use your voice to select AM/FM radio stations or SiriusXM® Satellite Radio channels, make calls, select navigation directions or record voice memos. English-, French- and Spanish-compatible. Available.

ENTERTAINMENT ///// Get the sound going via MP3s and available features like remote USB port, audio jack, hard-disc storage, Voice Command SiriusXM Satellite Radio (your first year of service is included) and Bluetooth Streaming Audio.

NAVIGATION ///// Provides enhanced GPS navigation and destination entry via Voice Command and SiriusXM Traffic for real-time traffic information on the go. Your first five years of SiriusXM Traffic service are included. Available.
With more than 70 standard and available safety, security and technology features, you can rest assured a high degree of advanced automotive technology went into making Challenger a thrill ride. Likewise, a high degree of advanced technology went into making each of those drives more secure.
FORWARD COLLISION WARNING (FCW). Radar sensors detect when your vehicle may be approaching an object too rapidly, alerting you with both an audible chime and a visual warning. Available.

ADAPTIVE CRUISE CONTROL (ACC). This system automatically adjusts cruising speed to maintain a preset distance between your vehicle and the one ahead. Available.

PARKVIEW® REAR BACK-UP CAMERA WITH DYNAMIC GRID LINES. The system displays an accurate visual reference of what is behind your vehicle when in Reverse. Audible chimes alert you when nearing objects. Available.

BLIND SPOT MONITORING (BSM) WITH REAR CROSS-PATH DETECTION. Dual radar sensors constantly monitor driver blind spots, providing notification of an encroaching vehicle via illuminating icons on the sideview mirrors and audible chimes. The system includes Rear Cross-Path Detection, which monitors for vehicles/objects in perpendicular relationships to the rear of the vehicle. It's invaluable when backing out of tight parking spots. Available.

RAIN-SENSING WINDSHIELD WIPERS. System sensors automatically detect moisture on the windshield and activate the wipers. Available.
Available Colors — Left (front to back): Sublime Green, Billet Silver Metallic, Ivory Tri-Coat Pearl, TorRed, Phantom Black Tri-Coat Pearl, Redline Red Tri-Coat Pearl. Right (front to back): Bright White, BS Blue Pearl, Granite Crystal Metallic, Jazz Blue Pearl, Pitch Black.

*Late availability.
We’ve been making cars for 100 years. We started with two brothers. They tinkered, experimented and sweated the details. They had energy and conviction that were impossible to ignore. They set the standard for us and for those who come after us. Dodge means doing things for a reason and being proud of the things we do. We want people to actually use their car for what the car is built to do. We think the car has been commoditized and that America’s drivers have been abandoned. We want to bring back America’s passion for driving. We will do this one Dodge at a time. This is what it means to be “Born Dodge.”
